

BuziBrAIns Supplier's Network

Introduction

Technology plays the major role in our success. Since day one we encourage our developers to innovate new ways of easing our clients task in their day to day business activities. And we are proud to introduce our innovation A.I.M.S. A.I.M.S. is developed to minimize the time and efforts in software development to provide extremely fast and bug free business applications to our clients.

Every research Every Technology is useless until its useful to people. With A.I.M.S. we develop very cost effective BPM and ERP Solutions for our clients. These applications help our clients to maintain the most tedious data during their business processes. In near future we eye to make this technology reach maximum number of people. So our journey will continue till every single entity in business world is touched by A.I.M.S.

BuziBrAIns Supplier's Network

Running business is surely tough job and especially when we start on our own. While implementing business software solutions for SME sector we observed that their business needs are quite personalized. SME Industry's contribution to Indian economy is huge but ignored lot. At BuziBrAIns we are proud to be part of this large sector and we surely understand the plight and hurdles faced by these entrepreneurs. Everyone wants to make profit with us but least bothered about our hurdles in business. They rarely care about the issues and simply humiliate by referring SME.

The most difficult task faced by SME is MARKETING. Reaching the right consumer in right time is the matter which always remains as mystery to explore and requires innovative ways to be introduced. There are many means to reach the client what remains different is the fact that purchase decisions are influenced by so many issues.

At BuziBrAIns, we are setting up the process where the cost of the marketing will be reduced. Its combined marketing exercise where our technical experts understand the product and services of the service provider associated with us. Our experts contact the clients on One-To-One basis and generated the leads for our business associates. Technology will again play major role here as we plan computerize the entire Supply Chain Process with direct client interactions for our business associates.

The supplier's Network brings most of the product/service suppliers under one roof.

Benefits Of Joining BuziBrAIns Suppliers Network
